CLIENT PORTAL

ACM
GLOBAL LABORATORIES

ACM Global Laboratories is committed to providing exceptional customer service throughout the clinical trials process, from inception to completion, and every step in between.

As part of this commitment, ACM is proud to provide a user-friendly, interactive live data portal for each client to manage current protocols. Compatible with Google Chrome, Internet Explorer (v. 11) and Mozilla Firefox, the informative and convenient Client Portal dashboard provides an overview of active studies, with access to 30 days of individualized client data and comprehensive reports with all historical data. The Client Portal also allows for the ability to order more study kits and track approvals, fulfillments and cancellations. In a pinch to find your data? Rapid protocol search functionality in conventional or SI units makes reporting easy, and a simple Excel file downloads on demand, as needed.

Compatible On

Google Chrome

Internet Explorer 11

Mozilla Firefox
